Little has been produced about the cultural or historic relevance of Sicily. The most invaded place on the planet, the three-sided island rivals Greece and Egypt as a primary source for Western ideas. Sicily: Land of Love and Strife takes the viewer to a place more fascinating and more diverse than other Italian region. This journey demonstrates that fewer places on the planet compare to Sicily for a story of spectacular beauty, epic human struggle, depth and diversity of culture, philosophic insights and historic sites. Because of the island's great natural abundance and its strategic location in the Mediterranean, at the crossroads of Europe, Africa and Asia, ownership of this rugged and fertile terrain has been contested for millennia. But for crime, Sicily has gone unexplored. The island's association with the Mafia, so deeply entrenched in popular consciousness, has obscured more rounded and accurate depictions of its history and culture.

Shot in Italy, the United States, Canada, Japan and Scotland, the film not only tells the inspiring stories of its main characters but also reveals the history of a dance company that has toured in over 50 countries and has a cult following worldwide. The dancers share stories about growing up, being gay and the many challenges and obstacles they faced to become professional ballerinas. The Aryans of Ladakh, known as “Drok-pa”, stand out as tall and sharp-featured with big eyes and a fair complexion, numbering around 5,000 and have preserved their racial purity down the centuries. It is this racial purity that continues to attract visitors from Germany to study and research special related characteristics of these original inhabitants. It is a little known fact that even in this day and age, a few German couples continue to visit Ladakh to indulge in their obsession for racial purity. They come to adopt Aryan children and, in some cases, for the German female to couple with an Aryan male in the hope of bearing what they consider the ‘racially superior seed’. Aryan Saga speaks candidly with couples in Germany who have been successful in rearing what they consider “Aryan progeny.” Seeking the answer the question – why this obsession with race? The documentary explores the various ethical, moral, psychological and legal issues involved in this strange and disturbing...but true phenomenon.

SAVING THE MUSTANG NORTH AMERICA’S HORSE ON THE BRINK OF EXTINCTION

*History/Animal* • 1 x 60’ HD

Wild mustangs have long been an icon of native peoples and early settlers of North America. Yet their fate today is uncertain. Traded, stolen and wild for 400 years, an estimated 2-3 million roamed North America in 1890 until they became almost extinct. The US Government has attempted to control the number of Wild Mustangs populated and in their view over grazed on vast tracks of public land. Over 41 thousand are now held in captivity. Saving The Mustang explores the state of wild horses today through the efforts of three individuals. Canadian horseman Randy Bird, endurance rider and song-writer Jean Albert Renaud and Roger William, past chief of the First Nation Xeni Gwet’in, who has created a 200,000 hectare wild horse preserve in the rugged wilderness of the Nemiah Valley in British Columbia. All three stories interweave a compelling tale of perseverance and determination – one that offers hope for these amazing animals.

F FOR FRANCO  
*Arts/Culture • 1 x 90’ HD*

With books, art shows, and director credits on his resume, one cannot call James Franco an actor and leave it at that. Franco has always had a strong interest in art and writing, and with the success of his more commercial feature film work came his realization that “Now is the time” for him to make the films he wants to, and to direct projects, write, and create art on his own terms, fulfilling his unique vision. Francisco J. Ricardo is an author, art theorist, and filmmaker who taught Franco at the Rhode Island School of Design, and it was here that Ricardo began to explore what inspires these less commercial, more artistically free films and projects. This documentary delves into an early portion of this large body of work, some based on projects he did in years past, others his artistic answer to critics and those who desire to use his name to snag their own piece of celebrity. Based on hours of personal interviews between Ricardo and Franco, and footage from his archives, F For Franco takes us on a visually unconventional journey into Franco’s mind and artistic process, inviting us not merely to look at, but to experience his more unusual projects.
