Augmented Reality Educational Books

These interactive books allow you to use your smart phone or tablet to interact with enhanced 3D augmented reality graphics. Grades 2-6.

3D Interactive Animation
Augmented Reality models are presented to enhance each page of the book

3D Info Labels
Students use AR to see 3D labels and explanations that are not in the book.

Interaction
Students interact with 3D models by resizing and rotating them to better visualize.

Augmented Reality app included with each book

Imagination – Let your student imagine while reading the book
Visualization – The app lets you visualize the books 3D form
Fun – Interactive games for each page in the book
Education – Simplified science content which is easy to deliver to your student

TO ORDER: Contact Magic Lantern Media at 1-866-999-5292 or sales@magiclanternmedia.com
**Imagina Books**

Blending science with visualization and integrating educational books to promote:

- Better understanding
- More engagement
- Hands on learning

**Book 1 – The Human Body**

Book 1, is a complete gamified journey of the human body. Students can explore all their body organs and functions with an interactive augmented reality experience. Includes Skeletal, Nervous, Digestive, Circulatory, Respiratory, and Urinary Systems.

The brain and the spinal cord together make up the Central Nervous System. Without it we can’t move which is why they are protected by the skull and spinal column.

Through sensory input, the brain, motor neuron, hand, and your hands...

The books are “hosted” by Sarah and Adam who interact with the reader to offer engaging insight.

**Book 2 – Solar System**

(available Nov 2018) Planets, Orbits, Solar System available to PRE-ORDER now.

$59.99 with app
